DirectX 9.0c (available on game CD)

Swap file: at least 768 MB

Mouse (2 button with wheel recommended)

5 060020 472954

Info

Requital is the life story of Wolfhound told through a beautiful 3D, third person action combat RPG epic in a world landscape inspired by 6th Century Russia with clothes, weapons and lifestyles reflected from this historic period.

With both his parents murdered not long after his birth and having escaped their murderous tormentors' imprisonment, Wolfhound's life's work is solely about avenging the savage destruction of his clan. Wearing a vale of amiability in order to secure information and experience, he takes the path of a supreme warrior and performs a variety of tasks, spends time building upon his skills, weapons and armour as well as perfecting his trade by fighting lesser enemies.

Experience shows him that danger lurks around every corner not only from the living but from the undead too. He knows only too well to keep his best weapon close to hand both day and night.

With only one outcome in mind from the start, you guide Wolfhound as he progresses through the game's main tasks but takes time out to accomplish many minor quests en route. However, he never deviates from his ultimate goal of slaying his parents' murderers with his own sword.

As you travel through Requital's massive world consisting of eight huge maps, you'll encounter forests, plains, swamps, mountains, caves, towns and settlements which deliver new stories, characters and tasks to complete as they open up to you.

Single-minded and a powerhouse of strength and versatility, can you guide Wolfhound on his mission to right the wrong perpetrated against his family many years before?

Game Features:

Three main weapon skills: Hand-to-hand, close combat weapons and ranged weapons

Improve your skills with weapons and see options open up to you

Special techniques included for every weapon including swords, spears, bows and fists

Multiple camera angles are available of Wolfhound in combat
